TECHNICAL REPORT FOR THE FESTIVAL TEAM

CAR WASH

Duration:approx. 35 minutes // Audience: all ages

Sound system

Car Wash is a show that is **fully autonomous in terms of sound system and electrical power**.

In the case of a very large space or a particularly large audience, it may be useful to connect the artist's equipment to a sound system provided by the organizers.

In this case, organizers are invited to provide:

- a sound system to complement the artist's own equipment,
- **access to a power outlet before the show** in order to recharge the devices,
- a 6.35 mm jack cable (large jack).

Set-up / dismantling: 10 minutes

Road

- **Vehicle / caravan:** Camper Fiat Ducato DV223JB
- **Dimensions:** 8 m long, 2.3 m wide, 2.80 m high

In case of air travel

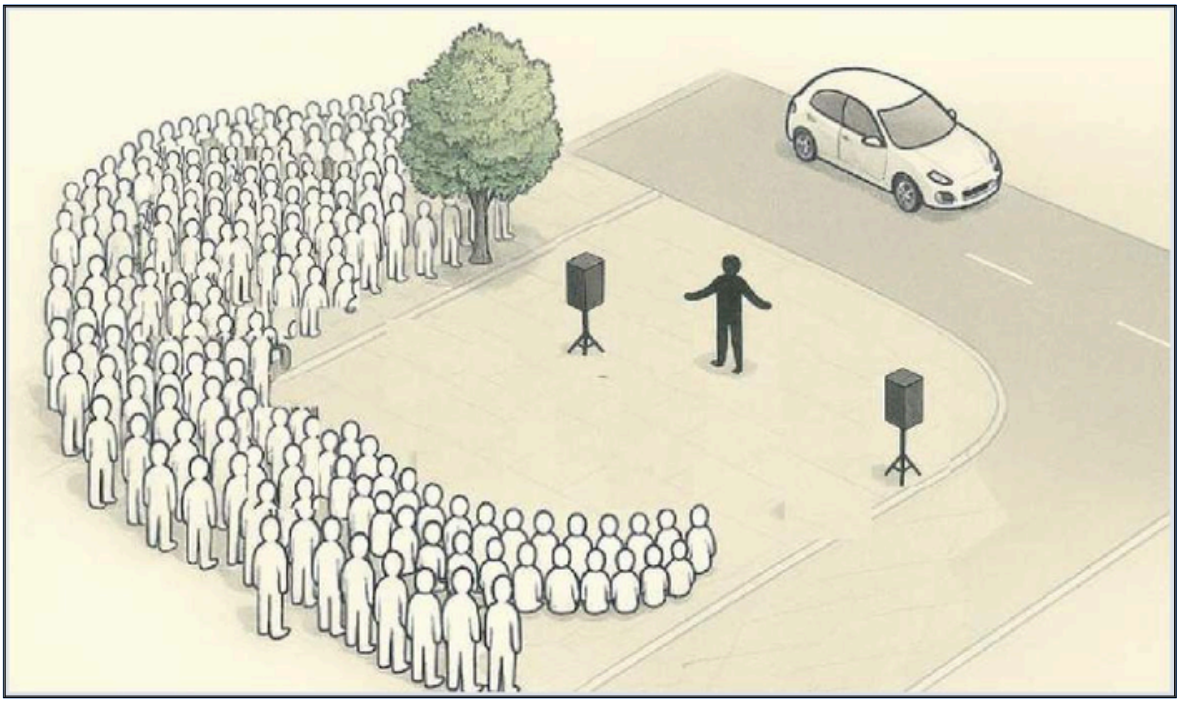

- One 10 kg carry-on cabin luggage
- One 20 kg checked luggage (approx. 70 cm x 50 cm x 30 cm)

Scenography

A sponge, water and soap
Pressurized water spray
Plastic buckets
Costumes for volunteers (giant brushes)

Handcrafted wooden cart with integrated sound system

Performance space

Ideal: a square, promenade, street, avenue or roundabout. Car traffic must be moderate and occasional so as not to cause traffic issues.

Obviously, public safety is fundamental. For this reason, there must be a reserved safe area from which the show is visible and that allows the artist to interact with the audience.

Safety:

At least two volunteers are required to monitor the audience during the show. The artist himself remains constantly attentive and vigilant to everything happening around the performance area.

ImproWash is the version of *Car Wash* without car traffic.
It was presented this year, in 2025, in Aurillac.
The show follows the same storyline as *Improlocura*, with a finale that recalls *Car Wash*.
